Commitment to Healthcare Services

SPECIALITY CHEMICALS

PRODUCT PROFILE

SR.NO.	NEW RANGE OF SPECIALITY CHEMICALS	CAS NO.
1	Dimethylamine Anhydrous and Solution	124-40-3
2	Dimethylamine Hydrochloride	506-59-2
3	Monomethylamine Anhydrous and Solution	74-89-5
4	Trimethylamine Anhydrous and Solution	75-50–3
5	Salicylic Acid Tech Grade	69-72-7
6	Methyl Salicylate	119-36-8

SR.NO.	REGULAR PRODUCTS	CAS NO.
1	Benzene sulfonyl chloride	98-09-9
2	Benzene sulfonic acid	98-11-3
3	Benzene sulfonic acid methyl ester	80-18-2
4	Sodium benzene sulfinate	873-55-2
5	Para tolunesulfonyl chloride	98-59-9
6	Para toluenesulfonic acid methyl ester	80-48-4
7	Para toluenesulfinic acid sodium salt	824-79-3
8	Para chlorobenznesulfonyl chloride	98-60-2
9	Formamide (97%MIN)	75-12-7
10	Calcium fluoride (NLT 97%)	7789-75-5

SR.NO.	CAMPAIGN PRODUCTS	CAS NO.
1	N-Methyl methanesulfonamide	1184-85-6
2	O/p toluenesulfonic acid methyl ester	28804-47-9
3	N,N',N'-TRIS-(4-toluenesulfonyl)-Diethylenetriamine	56187-04-3
4	Para toluenesulfonyl hydrazide	1576-35-8
5	Para chlorobenzne sulphonamide	98-64-6

SR.NO.	LAUNCHING SOON	CAS NO.
1	Benzyl Salicylate	118-58-1
2	Hexyl Salicylate	6259-76-3
3	Octyl Salicylate	118-60-5
4	Trimethylamine Hydrochloride	593-81-7

What we serve to Crop Science or Agrochemical industry.

We provide a comprehensive range of **Methylamines** that serve as critical solvents, catalysts, intermediates, and building blocks essential for producing various crop science products or agrochemical intermediates.

Specifically, we offer **Dimethylamine (DMA), Monomethylamine (MMA), and Trimethylamine (TMA).** These methylamines play a crucial role as intermediates in the manufacturing of herbicides, fungicides, biocides, matricides, and insecticides. Additionally, they are utilized as base materials to produce agrochemicals with catalytic properties.

Our product specifications and supply options include:

- **Dimethylamine (DMA): Available as anhydrous and in aqueous solutions (40%, 50%, and 60%).**
- **Monomethylamine (MMA): Available as anhydrous and in aqueous solution (40%).**
- **Trimethylamine (TMA): Available as anhydrous and in aqueous solutions (30 %)**

We can supply these products in ISO tankers and MS drums to meet your specific logistical requirements.
